TOPIC ---

What Apple LaserWriter printers support TCP/IP printing? Also what additional
information do I need if I am printing from a non-UNIX workstation?

DISCUSSION --

The following printers support TCP/IP printing through their Ethernet
interface:

LaserWriter Pro 810
LaserWriter Pro 16/600 PS
Color Laserwriter 12/600 PS

To print from a non-UNIX workstation, configure the LaserWriter printer with an
IP address. In addition, you need to check a few things.

• Make sure your software supports LPR

• If your software refers to the LaserWriter by hostname, setup a host file or
Domain Name Service (DNS).

• If your software requires a socket number, Apple LaserWriters use socket 515,
the standard socket for LPR printing.
