TOPIC -----

Some Radius Accelerators are not compatible with a Macintosh SE with the SuperDrive. Is there a remedy for this?

DISCUSSION -----

The Radius Accelerator 25 with version 2.0 ROMs erases disks on a Macintosh SE with SuperDrive. And the Radius Accelerator 16 only recognizes the SuperDrive as an 800K drive with any ROMs prior to version 2.1.

Version 2.1 ROMs or greater cure these problems.
