TOPIC -----

How do you differentiate an Apple fan from a third-party fan in the Macintosh SE and Macintosh SE/30?

DISCUSSION -----

The Apple fan can be identified by an internal Apple part number engraved on the fan bracket on the side closest to the video board. The part number is either 805-0936 or something close to that number. Also, the Apple fan bracket is unique to Apple.

Some third-party companies tie-wrap or glue their fan onto the analog board. Others use brackets of their own design to mount the fan.
