## Macintosh 16 Color Display: Red HV Cable Replacement (3/94)

Article Created: 10 March 1994

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

TOPIC -----

What is the part number for the red wire running between the flyback transformer and the Focus/HStat control on the Macintosh 16" Color Display?

DISCUSSION -----

This cable is not available as a separate part from Apple nor the original manufacturer of the monitor. The wire is made with common high voltage cabling that can be purchased at most electronic parts stores. The connectors used with this cable are also readily available.

If the cable is damaged, a replacement should be fabricated with these readily available components.
