Macintosh LC 520/550/575: Security Screw P/N (5/94)

Article Created: 25 May 1994

* RESTRICTED: Apple Internal and Support Providers Only *
Not For General Public Release

TOPIC -----

This article describes the part number to use in replacing the security screws which secure the back panel of the Macintosh LC 520, 550, and 575.

DISCUSSION -----

Part number: 410-1308 Screw, M3X.5x8mm

This part is located in the Service Price Pages along with seven others, which makes it difficult to determine which one is the correct screw. Currently, the Service Price Pages do not specify this as the security screws or its purpose; which is to secure the back panel of the Macintosh LC 5xx series computers
