## Macintosh 630 Family: Logic Board Ground Clips Available (10/94)

Article Created: 26 October 1994

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

TOPIC -----

I just received a logic board for a Macintosh 630 family computer and it is missing the ground clips. Are they available separately?

DISCUSSION -----

It seems a number of Macintosh 630 family logic boards were released without corner ground clips. The logic boards included are 661-0158 (LC630 & Performa 63X) & 661-0189 (Quadra 630).

If you received a board without ground clips, they are now available as part number 922-1279 for a bag of 25. Instructions for installation come in the bag with the clips and will be added to Service Source in the near future.

The following computers are in the Macintosh 630 family: Performa 630, Performa 635, Performa 636, Performa 637, Performa 638, LC 630, and Quadra 630.
