Macintosh Performa: System 7.5 OS Kit and Utilities Disk (8/95)

Article Created: 13 March 1995

Article Review/Updated: 22 August 1995

* RESTRICTED: Apple Internal and Support Providers Only *
Not For General Public Release

TOPIC -----

When a customer calls Apple Assurance who has erased, otherwise lost, or corrupted the information that was pre-installed on his Macintosh Performa hard drive, Apple will send them an OS (Operating System) Kit to replace the lost software.

What software is contained in the System 7.5 OS Kit that Apple sends out to Macintosh Performa 63x and 475 owners through the LogistiX Fulfillment process?

DISCUSSION -----

The following discussion contains some general notes about the new 7.5 OS Kit and the Utilities disk that comes with it.

The kit was built with the Macintosh Performa 630 series in mind. The Utilities disk that comes with it is version 7.1.2P1 and only has "System Enabler 405" in its System Folder; the one which will boot the Macintosh Performa 630 series. It also comes with the application "Internal HD Format" (written for the IDE hard drives only found on the 630 series) instead of "Apple HD SC Setup" (for SCSI drives)."

This Utilities disk will not boot a Macintosh Performa 475 (which is the other Macintosh Performa model that does not have an internal CD-ROM and comes pre-installed with System 7.5); but, you can still use this OS Kit on that machine if you have a bootable Utilities disk for it. Any Performa 475 (or any other Performa) can still use the 16 backup disks in the 7.5 OS Kit as long as the customer does not use the 7.1.2P1 Utilities disk that comes with it, but instead uses the Utilities disk that came with their computer.

If your customer does not have that Utilities disk either, it is available at LogistiX. You can fulfill it along with the 7.5 OS Kit.

A Performa 475 that came pre-installed with 7.5 and lost its system software needs the following from LogistiX to get it up and running again:

633-0576 Performa OS Kit 7.5 (16 disks + Utilities 7.1.2P1) (1)
690-0989 Utilities disk, 7.1p6 (1)

Below are the contents of what software the 7.5 OS Kit installs onto the hard disk of a computer in a "view by name" format with all the sub-folders indented. In most cases, the versions of documents and other items are given after the name.

OS Kit 7.5; 16 disks + Utilities
