Macintosh LC 630 Price Page Error (3/95)

Article Created: 24 March 1995

TOPIC -----

I noticed a new logic board description under the Macintosh 630 family price pages. What is this board and what computers is it for?

DISCUSSION -----

The description for part number 661-0234 is Logic Board, 4MB, w/o FPU. The 661-0236 is a similar logic board, except it has an FPU.

The 661-0234 board will be used in the future and was mistakenly published. It should not be used in any Macintosh 630 family computer as it will downgrade that system in terms of the FPU.

This will all be corrected in the April service price pages.

The following computers are in the Macintosh 630 family: Performa 630, Performa 635, Performa 636, Performa 637, Performa 638, LC 630, and Quadra 630.
