                 Not For General Public Release

TOPIC ---

How many accelerated applications (also known as native) are there available for
the Power Macintosh platform.

DISCUSSION --

As of the date of this writing, there are 1,288 applications and utilities
recompiled to take advantage of the PowerPC microprocessor.

The list has become so long that it has become impossible to maintain in the
Tech Info Library. The most up-to-date, comprehensive list of native software
available can be found on AppleLink by the following path:

Power Macintosh -> 3rd Party Products -> PMAC Native Products List
