## Personal LaserWriter NT: Fix for Unwanted Pages During Standby

Article Created: 9 December 1991

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

TOPIC -----

I have a Personal LaserWriter NT that prints blank or startup pages while in standby mode. Is this a known problem, and is there a fix?

DISCUSSION -----

This was traced to a component on the Personal LaserWriter NT I/O Controller Board. The problem can be fixed by replacing the Personal LaserWriter NT I/O Controller Board from Service Stock. All of Finished Goods and Service Stock have been upgraded.
