TOPIC -----

A customer noticed that when the Display Enabler was removed, the icons on the screen (trash, hard drive, etc) would no longer stick to the edge of the screen when the monitor is resized, but instead stay in the middle of the screen. When the Display Enabler is installed, the icons move as the monitor is resized.

DISCUSSION -----

By installing the Scriptable Finder, on a Power Macintosh with a Multiple Scan Display, the disk and trash icons will move as the screen is resized. The scriptable Finder is included in both the retail AppleScript package and System 7.5.
