TOPIC -----

I have a Quadra 610 DOS Compatible system, and when I take a DOS formatted disk and try to reformat it as a Macintosh disk I get the error message, "Erasing the Disk Failed!". What's wrong?

DISCUSSION -----

There is an anomaly in Macintosh PC Exchange 2.0DC that will not allow formatting a disk for Macintosh once it has been formatted for a PC. This anomaly has been addressed in Macintosh PC Exchange 2.01. We verify the problem, and tested Macintosh PC Exchange 2.01 to confirm modifications were made to address this issue, which were.

You should upgrade to PC Exchange 2.0.1.
