TOPIC -----------------------------------------------------------

When I try to print multiple page documents on a Personal LaserWriter 300
printer, it only prints a couple of pages, then drops off the network. Once the
printer drops off the network, I get a communication error message. If I print
single page documents, this error doesn't occur.

DISCUSSION ------------------------------------------------------

On both the Personal LaserWriter 300 and Personal LaserWriter 320 printers, this
error can occur if the fan fails and stops rotating.
