Not For General Public Release

TOPIC -----

A customer is missing the mounting screws for the internal floppy drive on their Power Macintosh 7200. I checked the Service Price Pages and the Service Source CD, but I cannot seem to find the part number for the screws. What is the part number for the floppy drive screws?

DISCUSSION -----

The screws that are used for mounting the floppy drive in the 7200 are the same screws that have been used on previous enclosures like the IIsi, IICx, IICI, Quadra 610, Quadra 660AV, Power Macintosh 6100. You can order the FDHD mounting screws, part number: 844-0018.
