TOPIC -----

I am using Microsoft Office 4.2.1 on my Performa 5300. When I paste a Clip Art Gallery file included with the Powerpoint software into a Powerpoint document, the pasted image only appears as a grey box.

I can paste the clip art that comes with Microsoft Word into a Powerpoint document just fine. What is wrong?

DISCUSSION -----

This problem can occur on a variety of different Power Macintosh systems. Microsoft has a free software patch available which corrects the problem.

The application note can be downloaded from Microsoft's WWW server at the following URL:
