                 Not For General Public Release

TOPIC ---

When using a version of DAL that supports the hosts.cl1 file under
System 6, and install DAL using the System 7 install disks, will the
Installer "update" the hosts.cl1 file to a DAL Preferences file?

DISCUSSION --

No, System 7 Installation doesn't update host.cl1 file. You should update
the DAL Preferences file with the information from hosts.cl1, and remove
hosts.cl1 from the System Folder.
