TOPIC -----

This article describes a problem associated with SNA•ps 3287 Printer application and StyleWriter and ImageWriter printers, and the fixes made in the SNA•ps Print application.

DISCUSSION -----

- 1) It is not recommended that the SNA•ps 3287 Printer application versions 1.1 or 1.1.1 be used with a StyleWriter or ImageWriter printer. There is a significant amount of time required to print on those printers and customer satisfaction is low.
- 2) With the introduction of SNA•ps Print application the ImageWriter is faster and you also have the option to select "Draft" printing. Printing to a StyleWriter is still slow with SNA•ps Print.
