                 Not For General Public Release

TOPIC ---

We are using SNA•ps 3270 with 5 LU sessions and recently upgraded to SNA•ps
1.1.1.

Everything works fine until I type the IBM user id and press Enter. Then,
I get the system bomb message "System error occured. SNA•ps 3270 divide by
zero." The only option is to reboot.

DISCUSSION --

SNA•ps 1.1.1 has exhibited this divide by zero problem for some time. The
release of the SNA•ps 2.0 3270 gateway fixed it. There is a SNA•ps 1.1.2
that should fix your problem. You can keep all the other SNA•ps 1.1.1 items
like A/ROSE, SNA•ps /Access, and so on.
