TOPIC ---

Where is the "Sharing Setup" Control Panel information stored? In
other words, where is the Owner Name and/or the Macintosh Name information
(under Network Identity) stored?

DISCUSSION --

The Macintosh "Owner Name" is stored in the System file, in the STR
resource #-16096. The "Macintosh Name" is stored in the System file,
in the STR resource #-16413.

Note, this is the STR resource, not the STR# resource.
