TOPIC -----

This article gives a brief description of the changes found in System 7.5.3 Rev 2.2.

DISCUSSION -----

The Power Macintosh 9500/180 and 9500/200 ship with a slightly modified version of System 7.5.3 which includes a Splash Screen and Floppy Format fix. The system software installer disks 1 and 14 were modified to accommodate these changes. Also, Drive Setup and Drive Setup Guide were removed from the Disk Tools folder, and replaced with the Where's Drive Setup Read Me file.

To identify this modified version of System 7.5.3, the version string in About This Macintosh under the Apple menu changed to read:

System 7.5.3
Revision 2.2

Copyright 1996, Apple Computer, Inc.
