TOPIC --

I have the Apple TechStep connected to a Macintosh via the audio cable.
When I turn on the Macintosh, I don't get the startup tone nor do I get
error chimes. Is there a problem?

DISCUSSION ---

Connecting any stereo (audio) cable to the Macintosh stereo port disables
the Macintosh speaker, so when you attach Apple TechStep to the Macintosh
stereo port, you won't hear either the startup tones or error chimes. This
is normal.
