Apple Media Tool: Macintosh Runtime System Requirements (3/95)

Article Created: 24 February 1994

Article Reviewed/Updated: 1 March 1995

TOPIC -----

What are the system requirements for Macintosh computers which are running Apple Media Tool runtime modules?

DISCUSSION -----

Here are the system requirements:

- Macintosh computer with System 7.01
- Quicktime
- CD-ROM player (if the runtime module is distributed on CD-ROM)
- Sufficient memory to run your runtime with the "minimum allocation" memory

You can display the minimum allocation memory by selecting your runtime application in the Finder, then selecting Get Info from the File menu.
