Apple Media Tool: Cross-Platform Issues W/ Corrupt Desktop 8/95

Article Created: 17 August 1995

TOPIC --

I am having two problems with the Apple Media Tool. First, when I drop media
onto the Cross-Platform Check applet, the icon does not highlight.

The second problem I am having is that the Cross-Platform Check session log
reports errors that are not applicable to the type of media I am using. For
example, the session log reports that a PICT file needs a .MOV file extension
and it is in the wrong format.

DISCUSSION --

Both problems are caused by corrupt desktop files. You need to disable Macintosh
Easy Open and rebuild your desktop file. Apple Media Tool is incompatible with
Macintosh Easy Open, so do not use them together.
