Apple Media Tool: Runtime Maker Fails To Compile (8/95)

Article Created: 17 August 1995

TOPIC ---

I created a project in the Apple Media Tool and tried to compile it for both the
Macintosh and MS Windows by clicking the appropriate checkboxes in the Runtime
Maker. In some cases, the Runtime Maker fails to compile. In other cases, the
finished runtime does not work. Why?

DISCUSSION --

You should not compile a runtime for both the Macintosh and MS Windows at the
same time. Create a runtime for one platform, then create the runtime for the
other platform.
