Apple Media Tool 2.1.1: Sound Conversion to WAV Fails (3/97)

Article Created: 4 March 1997

TOPIC ---

I am using the AMT Converter, which came with Apple Media Tool 2.1.1, to convert
AIFF sound files to WAV sound files. However, the conversion fails and the log
reports "•••Unknown Error". This fails with both 8-bit and 16-bit AIFF files.

DISCUSSION --

When you install Apple Media Tool 2.1.1, QuickTime 2.5 is installed. The issue
you are experiencing is related to an incompatibility with QuickTime 2.5 and the
AMT Converter. In order to convert AIFF sound files into WAV sound files, remove
QuickTime 2.5 and install QuickTime 2.1. When you do use the older version of
QuickTime, you can successfully convert the sound files.
