QuickTake 100: No OCR Support (3/94)

Article Created: 23 March 1994

TOPIC --

Can I use the Apple QuickTake 100, like I would a scanner and take pictures of a
document, then use Optical Character Recognition (OCR) software to convert the
picture into text?

DISCUSSION ---

Apple does not support this. One of the main problems would be the focal range.
The QuickTake 100 has a 4-foot focal range. At 4-feet, the document image is too
small to use with OCR software.
