QuickTake 100: Battery Charger Not 220V Compatible (12/94)

Article Created: 14 December 1994

TOPIC -----

Is the QuickTake 100 battery charger supplied in the US compatible with 220/240V AC?

DISCUSSION -----

The battery charger supplied with the U.S. version of the QuickTake 100 camera is designed for 110V/60Hz use only. Customers who wish to use the QuickTake 100 camera in foreign countries should either purchase the correct battery charger from an authorized Apple service provider in the country that they are visiting, or purchase an over-the-counter universal ni-cad battery charger from a local electronics store. The QuickTake 100 uses standard AA ni-cad batteries, so there are many different chargers worldwide that customers can use.
