## Multimedia Kits: Overview of Three Bundles (9/93)

Article Created: 1 September 1993

Article Reviewed/Updated: 12 October 1993

TOPIC -----

At the time of introduction, three CD-ROM Multimedia bundles will be available for the USA and English-speaking geographies. The CD-ROM bundles are first in a series of bundled media products including "cross-platform" into the PC world. They include everything a customer needs to get started with the CD-ROM and media applications by creating an all-in-one solution. This article describes the three bundles.

DISCUSSION -----

The first bundle is targeted at existing Macintosh customers.

Apple CD Multimedia Kit for Macintosh (M2159LL/A)

- AppleCD 300 drive and caddy  
SCSI system cable, and terminator
  - AppleDesign Powered Speakers  
Powered speaker and satellite speaker  
Power-supply module (120-V input)  
Computer-to-speaker cable (with 3.5-mm miniplugs)  
CD stereo cable with RCA jacks  
Speaker-to-speaker cable
  - Compton's Multimedia Encyclopedia
  - Apple Multimedia Starter CD
  - CD-ROM titles brochure: an entitlement to 3 free CDs of the customer's choice
  - Complete instructional documentation for setup and reference
- \* Macintosh System requirements \*
- Any Macintosh running system software version 6.0.7 or later with a 68020 microprocessor or greater
  - At least 5MB of RAM (or more) recommended
  - A color display with 640 x 480 pixel resolution or greater

The second bundle is targeted at the PC-compatible and Windows customers. It's an "internal upgrade" meaning that the CD-ROM and

Sound Card are mounted internally.

CD Multimedia Kit for PCs (M2160LL/A)

---

- AppleCD 300i (internal) drive and caddy  
Internal SCSI and audio cables, AT mounting rails
- AppleDesign Powered Speakers
