Apple Multimedia Kit for PC: No Speed Switch in DOS (9/95)

Article Created: 27 March 1995
Article Reviewed/Updated: 7 September 1995

TOPIC ---

The Macintosh Apple CD-ROM Setup control panel allows you to switch the AppleCD
300 CD-ROM drive to either double or single speed. How can I do this under
MS-DOS?

DISCUSSION --

Only version 4.x.x of the Apple CD-ROM Setup software was there a speed switch
for switching between single and double speed drives. This control panel was
discontinued in CD-ROM Setup software versions 5.0 and beyond because
engineering found that it was unnecessary.

The speed switch was never a feature of the Windows CD-ROM software driver.
