## QuickTime Conferencing: Modems Aren't Supported (3/96)

Article Created: 20 October 1995

Article Reviewed/Updated: 29 March 1996

TOPIC -----

Can I use QuickTime Conferencing from home through my modem?

DISCUSSION -----

Currently QuickTime Conferencing does not support dial-up (modem) connections. You need either an ISDN card, or other direct connection method to use QuickTime Conferencing. ISDN modems using a PPP/TCP/IP connection are also not supported.

This article was published in the Information Alley on 29 March 1996.

Article Change History:

29 Mar 1996 - Added information about ISDN modems not being supported.
