QuickTime Conferencing: Can't Use ISDN Crd w/Quadra 840AV (5/96)

Article Created: 10 May 1996

TOPIC ---

I have a Macintosh Quadra 840AV computer, and I'd like to use the QuickTime
Conferencing H.320 ISDN NuBus Card in my computer. I noticed that the QuickTime
Conferencing ISDN Kit Installation Guide states that I need a special DAV ribbon
cable to use the card in my computer. However, I'm not sure which cable I
specifically need in order to use the card.

DISCUSSION ---

The QuickTime Conferencing ISDN Kit Installation Guide manual is incorrect. As
stated in the QuickTime Conferencing H.320 ISDN NuBus Card ReadMe file, you must
have a Power Macintosh 7100AV or 8100AV computer in order to use this card.
