## QuickTime Conferencing: Third-Party NT-1 Companies (5/96)

Article Created: 14 May 1996

### TOPIC -----

This article contains a list of third-party companies providing Network Terminal Adapters (NT-1) for the QuickTime Conferencing Kit. A Network Terminal Adapter is required to use QuickTime Conferencing ISDN Kit over a Basic Rate Interface (BRI) ISDN line.

### DISCUSSION -----

The QuickTime Conferencing ISDN Kit (NuBus) M4585LL/A allows users of the QuickTime Conferencing Kit to do WAN videoconferencing and collaboration Mac-to-Mac or videoconferencing only Mac-to-PC and Mac-to-Room based system using H.320 hardware codec over Telco-supplied ISDN lines. Includes H.320 codec/ISDN card, H.320 ISDN software and accessory kit.

However, a Network Terminal Adaptor (NT-1) is required to use the QuickTime Conferencing ISDN Kit over a Basic Rate Interface (BRI) ISDN line. The NT-1 terminates the ISDN line at the user's end and powers the ISDN line from the network interface box to the ISDN device. An ISDN line requires power and is unusable in the event of a power outage. Connecting the NT-1 to a Uninterruptable Power Supply is suggested.

A NT-1 can be purchased through your local ISDN provider or you can purchase one from the following companies:

Companies	Phone Number	Model Name
Quicomm	1-800-244-3688	NT-1 Network Terminator
Intellicom	1-800-884-ISDN	Various models
PicturePhone Direct	1-800-810-9966	Tone Commander NT1U-220TC
