Macintosh QuickTime Movies on PCs (7/93)

Article Created: 07 July 1993

TOPIC ---

This article describes how to play Macintosh QuickTime movies on PCs
running Windows.

DISCUSSION --

To make a movie playable on a PC, open it on the Macintosh using the
Movie Converter utility (part of the QuickTime Starter Kit), and choose
Save As from the File menu. In the dialog box that appears, click the
checkbox "Playable on non-Apple computers" and "Make movie
self-contained." You must name the file with no more than eight
characters, plus the extension .MOV.
