Multi Media Applications Not Fully Launching (12/94)

Article Created: 21 December 1994

TOPIC -----

I have noticed a few of my multi media type applications fail to fully launch. They used to work fine.

DISCUSSION -----

If you have moved the QuickTime PowerPlug out of your Extensions folder, this could be part of the problem.

It is possible that your application is looking for resources available in the QuickTime PowerPlug, not finding what it's looking for, and then quitting without providing any feedback whatsoever.

Make sure that all the originally installed QuickTime files are in your system folder and all should be fine.
