QuickTime: Directing Playback to a MIDI Device (2/95)

Article Created: 27 February 1995

TOPIC -----

How do I direct QuickTime movie information to my MIDI device? Does it require additional software, and if so, where can I obtain it?

DISCUSSION -----

There are two sources of the Music Device Configuration software required to switch from the Macintosh Built In Software Synthesizers and Modem output to other MIDI hardware equipment.

The first source is a CD-ROM bundled with the book - "QuickTime - The Official Guide for Macintosh Users" - by Judith Stern and Robert Lettieri from Hayden books. \$45.00

The second source is the QuickTime 2.0 Software Developer Kit available from APDA. \$195.00.
