Macintosh: Photo Downloading from Wire Services

This article last reviewed: 25 June 1990

TOPIC -----

Do you know of any product that will permit a newspaper to download photographs from a photo wire service.

DISCUSSION -----

All of the news wire services we checked with feel that though this would be highly desirable (to download pictures directly into a Macintosh), this capability doesn't exist for any PC.

The news wire services presently support "photo" downloading to printers only, a service that can be purchased from Independent Network System (INS).
