Macintosh: Compressed Digital Audio Access from LaserDiscs

Article Created: 1 April 1991
Article Last Reviewed: 14 July 1992
Article Last Updated:

TOPIC -----

I'm interested in decoding "Time Compressed Audio" stored on a LaserDisc. This compression allows up to 300 hours of audio-only to be stored on a video LaserDisc.

Is there a Macintosh product for this purpose?

DISCUSSION -----

Fast Trax Digital Technologies, Inc. of Irvine, California sells encoder/decoder devices for the Macintosh and MS-DOS PC. The Macintosh needs only a software driver to use the equipment.

For more information, search on "Fast Trax".
