QuickTime 2.0 and Audio AIFF (3/94)

Article Created: 10 March 1994

TOPIC -----

Does the audio side of QuickTime 2.0 use AIFF as the standard file format or do we use some other format?

DISCUSSION -----

QuickTime has its own internal audio file format. All versions of QuickTime can point to an AIFF file as a source file, but no version of QuickTime uses AIFF as a native file format.
