Apple Video, Video/TV, and Presentation Systems (2/97)

Article Created: 31 August 1995
Article Reviewed/Updated: 17 February 1997

TOPIC ---

This article describes the Apple Video System, the Apple Video/TV System, Apple
TV/FM Radio System, and the Apple Presentation System.

DISCUSSION --

The following table lists the Macintosh Computers that can take advantage of the
Apple Video System, the Apple Video/TV System, Apple TV/FM Radio System, and the
Apple Presentation System:

Begin_Table

Computer	Systems
Power Macintosh 5200/75 LC	All
Macintosh Performa 580	All except Video/TV
Macintosh Performa 630 series	All
Macintosh Performa 640CD DOS Compatible	All
Macintosh Performa 5200 series*	All
Macintosh Performa 6200 series	All
Macintosh Quadra 630	All except TV/FM
Macintosh LC 630	All except TV/FM
Macintosh LC 580	All except Video/TV and TV/FM

End_Table

* Note:
The Macintosh Performa 5200 series requires the Apple External Video Connector
(M4099LL/A) in order to use the Apple Video System, the Apple Video/TV System,
and the Apple Presentation System.

Apple Video System (M2894LL/D**)

This multimedia solution comes with a user-installable video card and software
that lets you easily add still video images to the documents and presentations
you create on your Macintosh computer. The video card allows you to connect a
VCR, camcorder, laserdisc player, or other video source to your computer with a

single cable.

Compatible Computers:
 Quadra 630
 LC 580, 630
 Power Macintosh 5200, 5300, 6200, 5400, and 6300 series
 Performa 580, 630 series, 640 CD DOS Compatible, 5200 series, 6200 series,
 6300CD, 6320CD.

** Apple has revised its video-in card (and the part number) to make the card
more compatible with Power Macintosh computers. Earlier video-in card kits (with
part numbers ending in /A, /B, or /C) are not recommended for use with Power
Macintosh and/or Macintosh Performa 5200 series computers.

Apple Video/TV System (M2896LL/C)

The Apple Video/TV System gives your computer the capabilities of the Apple
Video System, and more--it also allows you to watch television programs in a
window on your Macintosh, and work on documents simultaneously. The Apple
TV/Video System comes with a video card, TV Tuner card, remote control, and
software.

Compatible Computers:
 Quadra 630
 LC 630
 Power Macintosh 5200/75LC, 5260/100, 5260/120
 Performa 630 series, 640 CD DOS Compatible, 5200 series*, 6200 series, 6300CD,
 6320CD.

Apple Presentation System (M2895LL/A)

The Apple Presentation System makes it easy for you to create a presentation on
your Macintosh, then display it to an audience on a larger television screen
exactly as it appears on your Macintosh display. You can also connect your
Macintosh to a VCR and record your presentation on videotape for easy and
inexpensive distribution. The Apple Presentation System comes with software,
cables, and video converter box. Unlike the Apple Video and Apple Video/TV
systems, the Apple Presentation System can be used with any Macintosh that has a
VGA or Apple 13/14-inch RGB output. This list includes, but is not limited to,
any PowerBook with VGA or Apple 13/14-inch RGB output, Macintosh LC, Performa
400-600 models, Centris, Quadra, or other Macintosh systems with VGA video out.

Apple TV/FM Radio System (M4586LL/A)

The Apple TV/FM Radio System consists of a plug-in card with TV and FM radio
tuners, plus easy-to-use control software. Connectors on the back of the tuner
card let you attach cable TV or antenna feedlines. An FM antenna is included.
The Apple TV/FM Radio System works with the Apple Video System*** to help you
perform powerful multimedia tasks easily. Just click to capture and save still
frames, video clips, or audio. Then simply paste the saved items into

presentations, reports, and letters to make them really come alive. Audio and video can be played back with any application that supports Apple's QuickTime multimedia technology.

*** The Apple TV/FM Radio System requires a Macintosh Performa or Power Macintosh computer with a video-in card. While some Macintosh Performa and Power Macintosh computers come with a video-in card pre-installed -- like, for example, the Power Macintosh 5400/120 -- most will require the purchase of the Apple Video System (M2894LL/D).

Compatible Computers:
 Performa 5400/160, 6360/160, 6400/180, 6400/200
 Power Macintosh 5260/120, 5400/120, 5400/180

Article Change History:
17 Feb 1997 - Added new part numbers.
10 Jan 1997 - Added TV/FM information.
04 Jan 1996 - Removed keyword.
