Apple TV/FM Radio System: Which Video-in Card to Use? (8/96)

Article Created: 8 August 1996

Article Reviewed/Updated: 9 August 1996

TOPIC -----

I want to install the Apple TV/FM Radio Tuner System (M4586LL/A) in my computer but I have an earlier version of the Apple Video System (video-input card). Do I need to upgrade to the latest Apple Video System, part number M2894LL/D?

DISCUSSION -----

The Apple TV/FM Radio Tuner System (M4586LL/A) was tested with all previous revisions of the Apple Video System and is backwards compatible with them.

Depending on your computer, you may need a new rear I/O Door which has the necessary access holes for both antennas. You need to ask an Apple-authorized service provider to order this for you. The Apple service part number for the rear I/O Door is 922-2190.
