## Newton: How to Beam Information To and From a Sharp OZ (7/93)

Article Created: 30 July 1993

TOPIC -----

This article describes how to beam information to and from a Sharp OZ/IQ 9000.

DISCUSSION -----

You can beam information to and from any series 9000 Sharp OZ/IQ.

To send a beam from a Newton to a Sharp OZ, send the beam as usual from yourNewton. Set the Sharp to receive any Direct IR transmission (detailed in the Sharp manual).

To send a beam from a Sharp to a Newton, send the beam as usual from the Sharp (see the Sharp manual for details). Receive the beam on your Newton according to the following instructions even if your Newton is set to receive beams automatically:

1) Tap Extras to open the Extras Drawer, then tap In Box.

2) Tap Receive, then tap Beam.
