## Newton: Notes Can Be Larger Than One Screen (7/93)

Article Created: 30 July 1993

TOPIC-----

When using Newton's Notepad, can a note be larger than one screen?

DISCUSSION-----

A single note can be any size from a fraction of the screen size to several screens long.

Here are two ways of getting more writing space after you fill a Notepad screen with information:

- 1) If you've made a new note between two other notes, drag downward the separator bar below your note.
- 2) If you are writing on the last note in the Notepad, tap the down arrow below the bottom of Newton's screen.

You can continue either of these methods until your Newton runs out of memory.
