Newton MessagePad: Out of Memory (7/93)

Article Created: 30 July 1993

TOPIC -----

My Newton MessagePad gave a message saying it was out of memory. What do I do?

DISCUSSION -----

If you got an out of memory message while adding text to a paragraph, you may not actually be out of memory. Try copying the paragraph and deleting the original.

If not, you need to provide more memory for Newton with a storage card, or delete some of the information in Newton's memory that you no longer need.
