## Newton MessagePad: Screen Problems (7/93)

Article Created: 30 July 1993

TOPIC -----

This article discusses remedies to some Newton MessagePad screen problems.

DISCUSSION -----

Here are some remedies for common Newton screen problems:

- If the screen on Newton is too light or dark, you can adjust the contrast. To do this, open the Extras drawer and slide the gauge at the bottom marked "Contrast."
- If you are getting a reflection on the screen, move somewhere where there isn't a light source directly overhead.
- If you are getting long, spidery lines on your screen, you may be resting your hand too heavily on the screen.
