## Newton MessagePad: AC Adapter Voltage Ratings (2/94)

Article Created: 22 February 1994

TOPIC -----

Will I need a power transformer to operate my Newton MessagePad on AC power outside of the United States and Canada?

DISCUSSION -----

The Newton MessagePad AC adapter has the following specifications:

Voltage: 100 to 240 volts AC  
Cycles: 50 to 60 Hertz

If the voltages at your destination conform to these specifications, then you need no extra transformer; the AC Adapter should handle these voltages properly. All you would need is an wall plug adapter for your destination country. This should be available in most electronic stores.
