Newton: Garbled Text with Canon Bubblejet (8/96)

Article Created: 25 February 1994
Article Reviewed/Updated: 27 August 1996

TOPIC ---

When I print to my Canon Bubblejet printer from my Newton using the Newton Print
Pack, the printer outputs multiple pages of garbled text. How can I get my
Newton to print to the Canon Bubblejet properly?

DISCUSSION ---

The Canon Bubblejet printer is capable of several types of emulation. The
printer must be set to "130e" emulation mode to print properly. In some cases,
having the printer set to the wrong emulation mode can cause garbled text and
multiple pages to be output.
