Apple MessagePad: Problem Viewing Consecutive Day Notes (3/95)

```
Article Created: 31 March 1995

TOPIC -----------------------------------------------------------

I have entered several birthdays as day notes on my Apple MessagePad 120.
However, when I select several consecutive days in the calendar that contain
some of them, none of them are displayed. If I select the day the day note is
created on, the day note is displayed. I'm following the example on page 93 in
the 120 MessagePad Handbook.

DISCUSSION ------------------------------------------------------

The Handbook is not clear. Only, non-repeating day notes can be viewed in this
manner.

WORK AROUND
-----------
If it is important to view day notes in this way, change the frequency in the
day note to "Don't Repeat".  Please be aware that these will only occur once
after changing this.
