Newton Keyboard: Uppercase Keys Don't Work (5/96)

Article Created: 8 May 1996

TOPIC -----

I have a Apple MessagePad with the Newton Keyboard. All the lowercase keys work properly, but not all the uppercase worked. I tried to use the caps lock and the shift key, but they resulted in lowercase characters.

DISCUSSION -----

When this happens you should reset your Apple MessagePad. Do not perform a hard reset. If you perform a hard reset any information in the internal memory are lost.

Resetting Your Apple MessagePad
=====

Step 1

Remove the battery cover

Step 2

With a pencil or pen, press the button next to the word RESET.

DO NOT use the pen that came with your Apple MessagePad.
