CompuServe Mail for Newton 2.0: Large E-mail Issue (9/96)

Article Created: 3 September 1996

TOPIC ---

When I receive a large e-mail with my Message Pad 130, the e-mail is split into
5 KB segments by CompuServe Mail Software for Newton 2.0, but a lot of the text
is lost in the process. To test, I sent myself a 38 KB message and found that
about 1000 bytes were missing between parts 1 and 2, and about 1500 bytes were
lost between each of the other parts.

DISCUSSION --

CISmail sometimes miscalculates the vertical size of a message displayed with a
large point font. Long sections of text may become cut off because the vertical
arrows will not scroll far enough to display the bottom of the message.

Workaround
----
1) Open the In Box
2) Select CompuServe Prefs (from the "I" button).
3) Click on mail font button.
4) Choose either a 9 point, or 10 point font size.
