Newton Connection Kit for Windows: Can't Use OS/2 (11/96)

Article Created: 2 December 1996

TOPIC -----

I have an Apple MessagePad 120 with the Newton 2.0 OS. I am trying to get data off the Messagepad 120 into my OS/2 computer. When I try to use the Windows shell within OS/2 with the Newton Connection Kit, an error message appears on the MessagePad stating that the PC is not responding. How can I get this to work?

DISCUSSION -----

The Newton Connection Kit for Windows is not supported using the Windows shell with OS/2. Apple Computer, Inc. does not have a solution for getting data from Apple MessagePad devices to OS/2 computers. Apple does not currently have plans to support OS/2 operating system.
